

HALLWAYS VAPING PREVENTION & RESPONSE PROGRAMMING

In order to support schools in preventing vaping and responding to suspected and reported use, Hallways now offers vaping specific program packages grounded in best practices in strategic substance use prevention.

This programming is designed to take your school community beyond drug facts and scare tactics to address underlying risk factors associated with drug use and provide needed support to students who are using.

For questions and information about pricing, please contact Natalie Zuckerman, Assistant Director, at natalie.zuckerman@hallways.org

1 Comprehensive Vaping Prevention & Support Package

Our comprehensive package supports your school community by addressing concerns about vaping and building skills for students, parents, faculty and school leaders. The following services are part of this package:

- [Consultation and Resource Sharing Session](#)

Through a targeted assessment, Hallways provides your school with a tailored set of recommendations, designed to best meet the needs of your community when responding to student drug and alcohol use. The following services are part of this package:

- [Consultation and Resource Sharing Session](#)
- [Multi-Modal Data Collection](#)
- [Policy Report](#) - Findings and Recommendations
- [Coaching Meeting with Administrators and Key Stakeholders](#)

HALLWAYS VAPING PREVENTION & RESPONSE PROGRAMMING

Curious about the contents of each package? Read more below!

Consultation and Resource Sharing Session

To ensure that our work is grounded in the specific needs of your school community, the first step in each package is a one-hour consultation session with school administrators to review and discuss key information regarding current school prevention efforts, substance use policies and historical incident response practices. Hallways will also provide vaping resources for your school if more immediate action is required.

Student Workshops: Values & Healthy Decision Making

In line with best practices in substance use prevention, Hallways Values & Healthy Decision Making workshops allows teens to build and practice the skills they need to make healthy choices and avoid unhealthy risks. Rather than focusing on drug facts or scare tactics, our workshops equip students with key skills linked to preventing high-risk behaviors and negative health outcomes in adolescents. This package includes a 30-minute information gathering call, a pre-workshop student focus group, four workshops for two sections of up to 15 students each and a wrap-up meeting with key stakeholders.

Parent Education - Understanding Vaping: Approaching Your Child with Curiosity & Compassion

Our parent workshop provides a space for parents in your community to learn about the latest research on e-cigarettes and to explore the underlying stressors that often prompt young people to engage in use. This workshop offers parents strategies for preventing use and approaching concerns about vaping with curiosity and compassion. We provide resources and tips for parents, and include time for Q&A.

Faculty Education - Understanding Vaping: Approaching Students with Curiosity & Compassion

This presentation provides faculty and staff with information about the nuts and bolts of vaping and e-cigarettes, along with best practices for preventing use. Together, we explore adolescent brain development, the impact substances can have during this critical period, and review strategies for preventing use and supporting student wellbeing.

Policy Consultation: Multi-Modal Data Collection & Report

In order to assess policy strengths and opportunities for growth, Hallways will conduct a faculty survey, counseling team interviews, and a multi-grade student focus group. Hallways will then share a summary of key findings and recommendations for strategic prevention of substance use on campus.

Policy Consultation: Coaching Meeting

Once findings have been determined, Hallways will review the report with school administrators and other key stakeholders and support your school in planning next steps. Additional coaching and consultation related to implementation of new policies and strategic response is available at an additional fee. A consultation add-on can be developed based on the needs of each school community.
